

# Blue Hour vs Golden Hour Photography

## Which Is Best for Your Wedding Photos?

[www.kellyphotoanddesign.com](http://www.kellyphotoanddesign.com)

## What Is Golden Hour Photography?

Golden Hour photography refers to the time just after sunrise or just before sunset when the sun sits low in the sky, casting a soft, warm glow. During this period, natural light becomes diffused and golden, giving everything a romantic, radiant tone.

## What Is Blue Hour Photography?

The Blue Hour occurs just before sunrise and just after sunset - that magical time when the sky turns deep blue and purple tones take over the horizon. It's shorter than the golden hour, lasting roughly 20-40 minutes, depending on your location and the season.

# Prefer Golden Hour for the Warm, Radiant Love Story

If your dream photos involve golden sunlight kissing your face, soft shadows, and romantic warmth, Golden Hour is your time to shine.

# Prefer Blue Hour for the Dreamy, Cinematic Love Story

If you're drawn to cooler tones, twinkling lights, and a slightly mysterious feel, Blue Hour Photography will melt your heart.

# Combining Both: The Ultimate Wedding Photography Trick

Why choose one when you can have both?

Many couples now plan their photos to capture the best of both worlds.

For example:

- Start your session during Golden Hour for soft, romantic light.
- Continue into Blue Hour for dramatic, elegant portraits.

With Kelly, you can discuss your preferences and even plan a shoot that blends both - capturing your love from the warm glow of sunset to the cool serenity of twilight.
