Start with a Creative Idea

Every great artwork begins with an idea. Think about what you want to create—a landscape, a character, a futuristic city, or an abstract concept. The more specific and imaginative your idea, the better the AI can interpret it.

Write Your Text Prompt

Once you have your idea, type it into the prompt box on OurDream.ai. This is where the magic begins. The platform uses your words to understand and visualize your intent through powerful AI models.
A good prompt usually includes:
- Subject: What's in the image?
- Setting: Where or when is it happening?
- Style: Realistic, anime, watercolor, cinematic, etc.
- Mood: Bright, mysterious, calm, or energetic.

Choose Your Art Style and Settings

OurDream.ai offers various art styles and customization options to give your image the perfect look. You can experiment with different aesthetics—photorealistic, painting-style, fantasy art, or digital illustration.
You can also fine-tune:

- Aspect ratio (square, portrait, or landscape)
