At Designer Plants, we see how a single tree can change the feel of a room. An olive tree brings a quiet, settled look, the kind that works just as well in a living room as it does in a shop or office. Many people come to us looking for an **artificial olive tree** because they love the look, but do not want the work that comes with keeping a real one alive. We get that. Not every space has the light, time or patience for a living plant.

Our range is made for residential and commercial spaces. We focus on shape, colour and detail so the tree looks right in the space, not stiff or fake. A good faux olive tree should blend in and soften the room. That is what we aim for with every piece we offer.

Thoughtful Faux Olive Tree Designs for Everyday Use

A well chosen tree should be easy to live with and easy to style. We keep things simple and focus on pieces that work across different spaces.

Here is what we pay attention to in our olive tree range:

- Natural looking leaves and branch structure
- Balanced shapes that suit homes, offices and retail spaces
- No watering, no shedding, no ongoing care
- Easy to move and simple to style in different rooms
- A Simple Way to Choose an Artificial Olive Tree

If you are thinking about adding an artificial olive tree to your space, we would love to help you find one that feels right. At Designer Plants, we make it easy to choose greenery that looks good and lasts well. Take a look at our range and see what works for your home or project.

Thank You
