

Frameless Glass Balustrades That Let Your Space Stand Out

Open space feels better. When heavy railings or solid barriers are taken away, everything feels lighter and more connected. **Frameless glass balustrades** do exactly that - they define a space without blocking it off.

These products can be used on balconies, staircases, pool decks and other outdoor living areas. Frameless glass balustrades are both safe and add to the beauty of the house.

A Practical Option for Everyday Use

In addition to their appealing design, glass balustrades help brighten up the interior and exterior spaces as they allow light to pass through them freely. The boundary between inside and outside spaces is virtually gone.

Another benefit is their easy maintenance. All they require is regular cleaning, and thanks to the robustness of toughened safety glass, they are durable and lasting.

That is why glass balustrades have become a popular choice for homeowners who are thinking about building an extension or remodeling their homes.

Where Frameless Glass Balustrades Can Be Installed

Glass balustrades are flexible and can be customised to suit different spaces and how they're used.

- Balconies where you want to keep the view open
- Staircases that benefit from more natural light
- Pool areas where visibility matters
- Outdoor entertaining spaces
- Offices and commercial buildings

Each installation is measured and fitted to the space, so it feels secure, clean and intentional.

Frameless glass balustrades stand out as one of the best options due to their ability to integrate without conflict. Frameless glass balustrades do not take up the design and instead sit in the background.

They can also complement other architectural designs made of glass such as pool fencing or shower screens, thus maintaining consistency of the property's look. If you want to install **frameless glass balustrades in Melbourne**, then making the right design choice will open a lot of space.

Contact **Clearly Frameless** to talk about **frameless glass balustrades** for your next residential or commercial project.
